General	In all cases of doubt, or when symptoms persist, seek medical attention. Never give anything by mouth to an unconscious person. Silicone defoamer emulsion. Keep out of eyes and off of skin.
Inhalation	Remove to fresh air, keep patient warm and at rest. If breathing is irregular or stopped, give artificial respiration. If unconscious place in the recovery position and obtain immediate medical attention. Give nothing by mouth.
Eyes	Irrigate copiously with clean water for at least 15 minutes, holding the eyelids apart and seek medical attention.
Skin	Remove contaminated clothing. Wash skin thoroughly with soap and water or use a recognized skin cleanser.
Ingestion	Dilute by giving large amount of milk or water. Get medical attention immediately. Do not induce vomiting.

4.2. Most important symptoms and effects, both acute and delayed

Overview	Effects of chronic overexposure: Eyes: None. Skin: Can cause irritation from repeated exposure. Inhalation: Mists may be irritating to breathing passages. Ingestion: Not a likely source of chronic exposure. Exposure to solvent vapor concentrations from the component solvents in excess of the stated occupational exposure limits may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms include headache, nausea, dizziness, fatigue, muscular weakness, drowsiness and in extreme cases, loss of consciousness. Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in dryness, irritation and possible non-allergic contact dermatitis. Solvents may also be absorbed through the skin. Splashes of liquid in the eyes may cause irritation and soreness with possible reversible damage. See section 2 for further details.
Eyes	Causes serious eye irritation.
Skin	Causes skin irritation.
